

**APPENDIX C**

Outside Booth Layout Guidance

Front (Customer Side)  
Single Wide 10' (3m)

Front (Customer Side)  
Double Wide 20' (6m)

Booth Area: Set up tent/canopy/roof over this area. May not have open flame grills larger than 2 sq ft, or deep fat fryers under this area. The tent/canopy/roof does not need to go back the full 20' as long as it completely covers the food preparation area. Do not use tents with angled legs as the legs must fit completely within the confines of your booth space.

Grill Area: Only attached to outside cooking booths. Tents, canopies, combustible materials cannot be in this area. Open flame grills >2 sq ft, deep fat fryers (require non-combustible roof), must be set up in this area with >5ft of clearance from the nearest tent/canopy. Refer/kitchen trucks can be in this area but require advanced coordination due at same time that electrical requirements are submitted. Late submissions will not be accepted.
